

Ball Screws

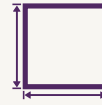

Compact and cost-effective ball screw spindle with an optimal combination of high load capacity, speed and accuracy for high-precision applications.

Technical Specifications

- High accuracy
- High rigidity
- Dust-tight standard design
- Available with right-left thread
- Reliable and durable quality
- Ground or rolled
- Wide range of lead nuts

Optional

- Customisation options such as special seals and surface treatments are available on request.

- Diameter 4 mm – 80 mm

- Slope 1 – 100

- Maximum load
Ca 627N – 219kN
Coa 950N – 890kN

- Precision C3, C5, C7

- Preload P0, P1, P2, P3, P4
